ALDELO INTEGRATED PAGING!

PAGING MADE TO INCREASE YOUR SALES!

InfoCubeOS is the revolutionary new Restaurant Paging System that also provides your customers with Local Information, Entertainment, and a First-Class Personal Ordering System for drinks and appetizers.

Waiting for a table is now fun and entertaining. The InfoCubeOS digital screen with easy-to-use control panel provides your customers with everything from menu specials to trivia games (not to mention the graphical Maitre d' who invites them to their table when it's ready).

Each unit comes equipped with a variety of user-selectable entertainment options including: Sports Trivia, Fun Facts, Famous Quotes, and a host of other options. Between the entertainment clips are carefully placed messages that you want to send directly to your customer.

InfoCubeOS Up-sells Your Patrons While They Wait

Imagine showing off your Dessert Menu, Drink Specials, or Upcoming Holiday Hours. You can introduce your Executive Chef or even display your Entire Menu! Your InfoCubeOS is prepared to deliver a precise message to your customers while they wait for their table. Get ready to WOW them and keep them coming back for more every time they think about dining.

Features

- Drink and Appetizer Specials can be ordered directly from the Pager.
- Table Ready Notification with Lights, Vibration, Sound, and the Graphical Maitre d' Fun Facts, Trivia, Famous Quotes, and more
- Mini Commercials Customized to Your Establishment
 - Easy-to-use Attendant Station
 - Patron Statistics

ALDELO WIRELESS TABLESIDE ORDERING!

Expand Customer Service with Table Side Order Entry

Aldelo For Restaurants Wireless is the ideal expansion to complement our Aldelo For Restaurants Pro. Our wireless POS solution enables your staff to efficiently fulfill customer orders anywhere in the restaurant. You will experience better customer satisfaction and improved table turnover as a result.

Aldelo For Restaurants Wireless enables your staff to focus on your customers. Our solution allows you to create and modify orders via wireless enabled PDA devices directly from your customers' table. No longer will your staff need to perform double order entry that may cause mistakes.

Increase Server Productivity, Improve Kitchen Response

All orders are efficiently sent to the kitchen & bar for quicker response via wireless network. Best of all, you have access to orders from both the wireless PDA and desktop POS.

Aldelo For Restaurants Wireless is also great as a line busting tool for speeding up take out and drive thru orders.

Fully Integrated with Restaurant Point of Sale

Aldelo For Restaurants Wireless is fast, responsive and fully integrated with Aldelo For Restaurant Pro Edition. Our wireless POS solution utilizes Windows Terminal Services to deliver unmatched reliability and fault tolerance on PDA devices.

Solid Performance & Reliability

Unlike other wireless POS solutions that rely on PDA devices to do all the work, causing slow screen refreshes and frustrating data corruptions. Our wireless innovation is responsive and reliable. In the event of wireless network outage or damages to a PDA, you will not lose any data. Upon next logon to your wireless network, you will return to where you just left off.

Lowered Total Cost of Ownership

Aldelo For Restaurants Wireless is also cost effective. Your total cost of ownership is greatly reduced from reasonable startup investments and lowered ongoing maintenance costs. Application updates are centralized to the server computer only, rather than each PDA devices. Aldelo For Restaurants Wireless enables your staff to focus on your customers rather than the PDA.
